

BESTLINK STRATEGIES, LLC.

Course Description

STIGs 101

Description: This course dissects the implementations of Security Technical Implementation Guide (STIG), a cybersecurity methodology for standardizing security protocols within networks, servers, computers, and logical designs to enhance overall security. In addition, this course is designed to prepare students with a solid foundation in job readiness, applicable to DoD (Department of Defense) vulnerability management. This course will also contain a mixture of hands-on self-paced modules and labs created by the instructor.
